

TILT GARAGE DOORS

The most prominent visual feature of your building, factory or shed is often the garage door. So it makes sense to choose our V-Line tilt garage door because it's the ideal combination of strength, security and aesthetic appeal.

FEATURES

- Spring balanced
- Small headroom and sideroom clearance requirements
- Steel frames

APPLICATION

As tilt garage doors are predominately used in private garages on residential homes or units, factors such as ventilation, strength, security and appearance are important. In a world of choice, we have endeavoured to cover all possible needs with its diverse and innovative product range.

The V-Line tilt garage door has successfully been used in garages for over 30 years. This range has proven to be the premier choice for superior strength and appearance.

Engineered using the latest roll-forming technologies, this door significantly increases the security of the basement lock-up garage. Often the forgotten feature of multi dwelling developments, this garage door will also significantly improve the appearance and marketability of your basement car park.
