

Accessories

For the ultimate in convenience and functionality, we offer a range of optional accessories to complement standard operator installations. The most popular accessories are:

Digital keypad

Weatherproof aluminium digital keypad with cover, which can be programmed with 4 digit pin code for maximum security. Includes back-light for your convenience when used in poor lighting situations.

Battery back up

Battery 12 V 1,2 A. and battery charger to operate 24Vdc motor when no main power available.

Photocells

For added safety, this allows the garage door to automatically reverse when its sensory light beam is broken by an obstruction, helping to protect your family from injury and your car from the damage caused by contact.
1.2 Watt power supply 240Vac / 24Vdc.

Wall button

Can be installed near an internal access door to your garage giving you greater convenience to open and close your garage door.

Add-on receiver

- fixed / rolling code radio receivers
- 2 channel
- 200 transmitter capacity
- designed for gate openers
- 240Vac / 24Vdc.

Optional transmitter covers colours include

- red
- green
- grey
- orange
- pink
- blue

SECTIONAL GARAGE DOOR OPERATOR

show your true colour

FORZA 1200 SECTIONAL GARAGE DOOR OPERATOR

The FORZA 1200 Sectional Door Operator is pure Italian design applied to Italian technology. The high quality materials and latest technology will ensure years of trouble free operation.

Courtesy light

This courtesy light is the most convenient way to navigate through your garage and to get in and out of your car. The light automatically switches on and off as you open and close your garage door.

- For sectional garage doors up to 16 sq. metres
- 24Vdc motor with full safety features for residential use
- 433MHz frequency rolling code transmitter
- 1200N of operating force
- A manual release in case of power outage
- One pre-assembled guide (C rail with belt)
- Courtesy light included
- Dual position power head mounting system
- 5 year motor warranty, 2 year electronics warranty
- Maximum capacity 20 remotes

Quality and adaptability

Forza garage door operators are manufactured from quality composite materials, and are approved to the latest world-wide standards. They can also be fitted to most popular brands of sectional garage doors with accessories to suit your requirements.

Auto reverse system

For added safety, the operator comes with this feature that causes the garage door to immediately stop and reverse when it comes into contact with an object. In addition, if optional photocells are fitted, the garage door will automatically reverse when its sensor light beam is broken by an obstruction, helping to protect your family from injury and your car from the damage caused by contact.

Soft start and stop function

This feature is designed to allow for a quiet and smooth garage door operation, which is important when the garage is located close to bedrooms or living areas.

In-built safety timer

This adjustable setting automatic close timer will ensure that your door will close automatically (must be used with optional photocells only) if you forget to close it yourself. This is a fantastic security feature that will ensure that you have peace of mind.

Easy to install and service

Approved to world-wide standards and covered by a 5 year domestic motor warranty. Experienced service technicians provide repairs and replacement parts for your new or existing garage door, motor or remote.

Water resistant handset

The water resistant 4 channel transmitter is the result of the application of the most advanced technologies available today. The tri-injection molding process enables the use of three different materials during the same working cycle optimizing the final appearance of the product.

- Water resistant
- 4 channels
- 433MHz frequency rolling code transmitter
- 8mA transmission consumption
- 8 colour options
- designed for gate and door automation
- 3V lithium battery
- IP 67 protection
- 1 black and 1 white transmitter as standard
